

This or That

Name: _____

Class: _____ Date: _____

Objective: Convert between common metric units.

1) Change each piece of information into the smaller unit shown.

Weight 9.8 kg = g

Length 1.7 m = cm

Capacity 60 litres = ml

Weight 2.4 kg = g

Diameter 14.2 cm = mm

Capacity 5.2 litres = ml

2) Bradley is making some cakes. The recipe says 'Add 0.3 litres of milk'. His measuring jug shows only millilitres.

Ring the correct number of millilitres:

30 ml 3 ml 300 ml 303 ml

3) Parvati's dad has bought a new car. It has a length of 4.2 m. What is this in centimetres?

Ring the correct answer:

42 cm 0.42 cm 420 cm 4200 cm 402 cm
